

Read Me — Movement Unlimited Application

Movement Unlimited is a web-based practice management application built for Movement Unlimited. It provides a single place to manage client records, book and document sessions, track exercises, apparatus and props, record physio notes, and generate reports. The application runs in any modern browser and is intended for day-to-day use by owners, administrators, and trainers on tablets when using the application.

This application was developed by **SUMSolutions**, a student team from the **Niagara College Computer Programming** program, as a project delivered for Movement Unlimited. It is hosted on Microsoft Azure at <https://mu5prototype1.azurewebsites.net/> and can be accessed from any device with an internet connection.

For a full walkthrough of every feature, see `UserManual.pdf` in this archive.

You must be connected to **WiFi** to use Movement Unlimited.

Get started

1. Log in for the first time

1. You'll see the **Login** page.
2. Enter the email for your role (see `DefaultAccounts.pdf`).
3. Enter the password from `DefaultAccounts.pdf`.
4. Tap **Log In**.
5. Once signed in, **change your password** straight away.

Important: The default passwords are placeholders. Change them the first time you log in and store the new password safely.

2. Which account should you use?

For your very first login, use the **Owner** account. This lets you set up additional accounts for your staff and explore the application with full access while you get familiar with it.

3. Logging out

When you are finished, tap your name in the top-right corner and choose **Log Out**. You will also be logged out automatically after 8 hours of inactivity.
